

A Guide to Maths Calculation Methods

in KS1 & KS2

Maids Moreton CE School

2021

This guide has been written to help you understand how mathematical calculation is taught at Maids Moreton CE School. It shows the progression in mental and written calculations that we teach our children in each year group. We know that you are keen to help with your child's maths education but may be unsure how best to support them, as the methods we use today may have changed from the time when you were at school. We hope this guide will enable you to feel more confident in how to support your child's learning.

The guide also provides our staff with a clear and consistent framework for teaching mathematical calculation and shows a clear progression of skills for the four main disciplines of number: addition, subtraction, multiplication and division. Children are taught why the methods work, not just how to perform them.

The National Curriculum states that children should become fluent in the fundamentals of Mathematics, be able to reason mathematically and solve problems by applying Mathematics. To support this mastery approach our skills progression is supported by the White Rose maths scheme, which helps children to build on their mental and written calculations in small steps, and therefore, develop a deeper understanding of number. In order to suit each age group and level of differentiation required, we use the principle of the Concrete-Pictorial-Abstract approach to help children gain a true understanding of each mathematical concept:

- **Concrete representation** - a pupil is first introduced to an idea or skill by acting it out with real objects (e.g. cubes, counters, counting bears, bead strings etc). This is a 'hands on' component and is the key foundation for conceptual understanding for all children.
- **Pictorial representation** – a pupil has sufficiently understood the practical experiences performed and can now relate them to representations, such as a diagram or picture of the problem. This may include using number lines, bar models, arrays, tens frames, and other drawn methods to support their working out.
- **Abstract representation** - a pupil has now built sufficient confidence and understanding to represent problems using mathematical notation, for example $12 \times 2 = 24$, and more complex written methods such as column addition or long division.

It is important that conceptual understanding, supported by the use of representation, is secure for all operations before moving forward with other concepts, and our staff continually reinforce this depth of learning by going back and forth between these methods where required.

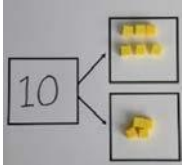

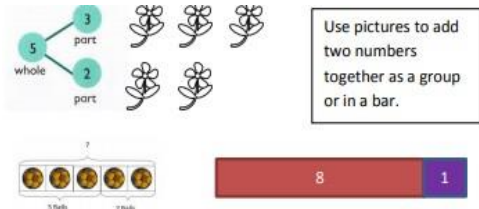

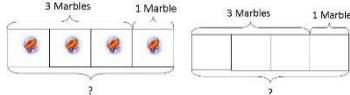

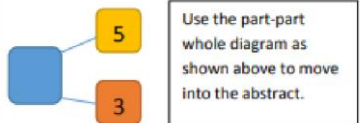

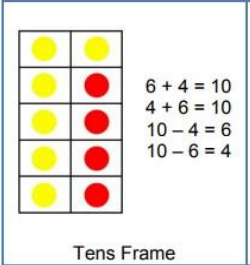

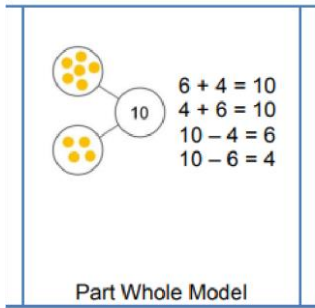

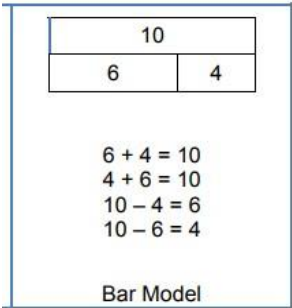

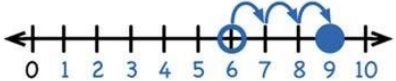

For those children who show strong mathematical skills and understanding, the intention is to deepen their learning rather than move them into the next year's curriculum. We recommend that parents avoid the temptation to look at upcoming strategies and instead, support their child in developing their confidence further in the appropriate methods and concepts for their own year group. Your child's teacher will be able to explain the different ways you can do this, for example using open-ended challenges, more difficult problem solving tasks and explaining their reasoning in different ways.

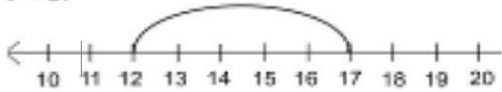

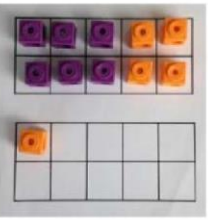

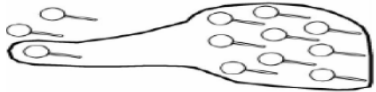

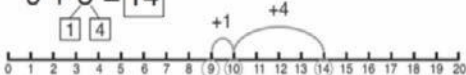

Addition

Addition - EYFS

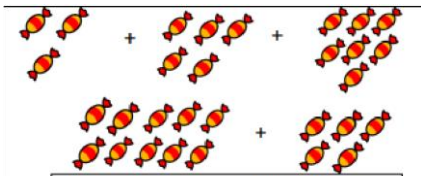

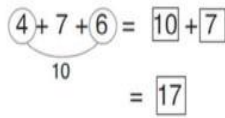

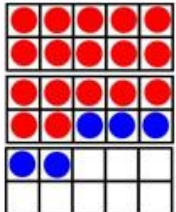

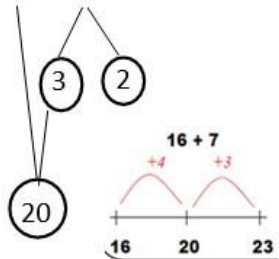

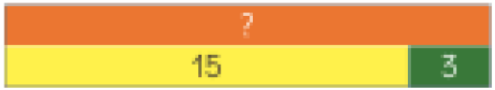

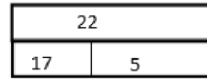

Objectives	Concrete	Pictorial	Abstract
<p>Knows that a group of things change in quantity when something is added.</p> <p>Find the total number of items in two groups by counting all of them.</p> <p>Says the number that is one more than a given number.</p> <p>Finds one more from a group of up to five objects, then ten objects.</p> <p>In practical activities and discussion, beginning to use the vocabulary involved in adding.</p> <p>Using quantities and objects, they add two single digit numbers and count on to find the answer.</p> <p>Solve problems including doubling.</p>	<p>Use toys and general classroom resources for children to physically manipulate, group/regroup.</p> <p>Use specific maths resources such as counters, cubes, Numicon etc.</p> <p>Use visual supports such as ten frames, part-part-whole and addition mats, with the physical objects and resources that can be manipulated.</p>	<p>Two groups of Pictures, so children can count the total.</p> <p>Bar model using visuals, pictures/icons or colours.</p> <p>Use visual supports such as ten frames, part part whole and addition mats with pictures/icons.</p>	<p>A focus on symbols and numbers to form a calculation.</p> $5 + 2 = 7$ <p>whole 5, part 3, part 2</p> <p>2 3, 5 2, 3 3, 5 5, 6 2</p> <p>* No expectation for children to be able to record a number sentence/addition calculation.</p>

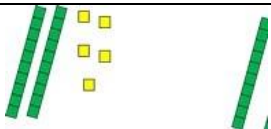

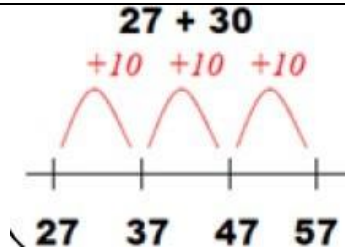

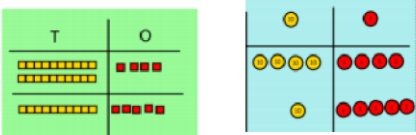

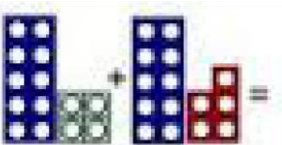

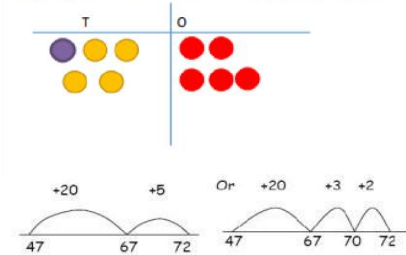

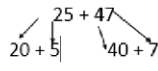

Addition - Year 1

Objective and Strategy	Concrete	Pictorial	Abstract
Combining two parts to make a whole: part- whole model	 <p>Use cubes to add two numbers together as a group or in a bar. (Some children may still need to use real objects)</p>  <p>Use part-part whole model</p>	 <p>Use pictures to add two numbers together as a group or in a bar.</p> <p><u>The Bar Model</u> will be continued from EYFS as a method to support problem solving involving addition, continuing with the concrete representations and moving onto using pictorial representations of objects. Some children will also move onto the abstract.</p>  <p>Pictorial (concrete) Abstract</p>	 <p>Use the part-part whole diagram as shown above to move into the abstract.</p> <p>$4 + 3 = 7$ $10 = 6 + 4$</p>
Represent and use number bonds and related subtraction facts within 20	 <p>Tens Frame</p> <p>(Some children may need to initially use real objects then move onto the representation, egg boxes may also be used to support this)</p>	 <p>Part Whole Model</p>	 <p>Bar Model</p> <p>Bar model and part-part whole to be used alongside abstract</p>
Addition and subtraction of one-digit and two-digit numbers to 20 including 0.		<p>$6 + 3 = 9$</p>  <p>Start at the larger number on the number line and count on in ones.</p>	<p>$5 + 12 = 17$ $17 = 12 + 5$</p>

<p>Start at the bigger number and counting on</p>	<p>Start with the larger number on the bead string and then count of to the smaller number 1 by 1 to find the answer.</p>	<p>$12 + 5 = 17$</p>  <p>Start at the larger number on the number line and count on in ones or in one jump to find the answer.</p>	<p>Place the larger number in your head and count on the smaller number to find your answer.</p>
<p>Regrouping to make 10 (The 'Make 10' strategy)</p>	<div data-bbox="465 384 748 504">  </div> <div data-bbox="808 384 913 408"> <p>$6 + 5 = 11$</p> </div> <div data-bbox="465 523 672 743">  </div> <div data-bbox="696 515 869 722"> <p>Start with the bigger number and use the smaller number to make 10. Use ten frames.</p> </div>	<div data-bbox="1055 352 1429 467">  <p>$3 + 9 =$</p> </div> <p>Use pictures or a number line. Regroup or Partition the smaller number using the part part whole model to make 10.</p> <div data-bbox="1021 639 1485 746"> <p>$9 + 5 = 14$</p>  </div>	<p>$7 + 4 = 11$</p> <p>If I am at seven, how many more do I need to make 10. How many more do I add on now?</p>

Addition - Year 2

Objective and Strategy	Concrete	Pictorial	Abstract
Adding 3 1-digit numbers	<p>$4 + 7 + 6 = 17$</p> <p>Put 4 and 6 together to make 10. Add on 7.</p>  <p>Following on from making 10, make 10 with 2 of the digits (if possible) then add on the third digit.</p>	 <p>Add together three groups of objects. Draw a picture to recombine the groups to make 10.</p>	 <p>Combine the two numbers that make 10 and then add on the remainder.</p>
Adding a 2-digit number and ones	 <p>$17 + 5 = 22$</p> <p>Use ten frame to make 'magic ten'</p> <p>Children explore the pattern.</p> <p>$17 + 5 = 22$</p> <p>$27 + 5 = 32$</p>	<p>$17 + 5 = 22$</p> <p>Use part-whole and number line to model.</p>   <p>Bar Model</p>	<p>$17 + 5 = 22$</p> <p>Explore related facts</p> <p>$17 + 5 = 22$</p> <p>$5 + 17 = 22$</p> <p>$22 - 17 = 5$</p> <p>$22 - 5 = 17$</p> 

<p>Adding a 2-digit number and multiples of 10</p>	 <p>$25 + 10 = 35$</p> <p>Explore that the ones digit does not change</p>	 <p>Base 10 may be used above the number line initially.</p> <p>The calculation will be shown alongside the number line to see the connection</p>	<p>$27 + 10 = 37$</p> <p>$27 + 20 = 47$</p> <p>$27 + \square = 57$</p>
<p>Adding two 2-digit numbers (No re-grouping)</p>	<p>$24 + 15 =$</p> <p>Add together the ones first then add the tens. Use the Base 10 blocks first before moving onto place value counters.</p>  <p>(Some children may not be ready for place value counters in Y2)</p> <p>Numicon be used</p>  <p>may also</p>	<p>After practically using the base 10 blocks and place value counters, children can draw the counters to help them to solve additions.</p>  <p>Use number line and bridge ten using part whole if necessary.</p> <p>Base 10 may be used above the number line.</p> <p>The calculation will be shown alongside the number line to see the connection</p>	 <p>Partitioning:</p> <p><i>Recording addition in columns supports place value and prepares for formal written methods with larger numbers.</i></p> <p>Toward the end of the year, children move to more formal recording using partitioning method:</p> $\begin{array}{r} 40 + 7 \\ 30 + 5 \\ \hline 70 + 12 \end{array}$

Addition - Year 3

Objective and Strategy

Add and subtract numbers with up to 3-digits, using formal written methods of columnar addition

Column addition (no regrouping)

Concrete

Using manipulatives (dienes, numicon, counters), children are to line up hundreds, tens and ones.

Children should be secure with using PV counters before moving onto pictorial.

The calculation will be shown alongside the model used to see the connection

Model	Calculation

Pictorial

Children are to draw, in a PV frame, the manipulatives, that they are using.

Secure knowledge of representation with the PV columns.

The calculation will be shown alongside the model to see the connection

Model	Calculation

Abstract

$$\begin{array}{r} 223 \\ + 114 \\ \hline 337 \end{array}$$

Children to move onto recording more formally.

Some children may need to use the expanded method (see below).

Column addition (with regrouping)

Children can draw a representation of the grid to further support their understanding, carrying the ten **underneath** the line.

$$\begin{array}{r} 20 \\ 40 \\ 60 \end{array} + \begin{array}{r} 5 \\ 8 \\ 13 \end{array} = 73$$

Children are to begin with the abstract: expanded form.

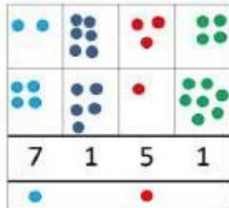

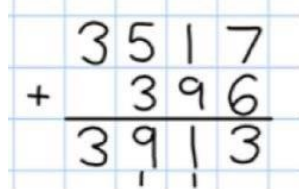

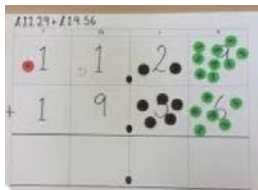

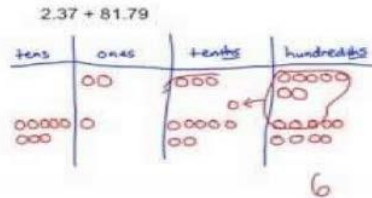

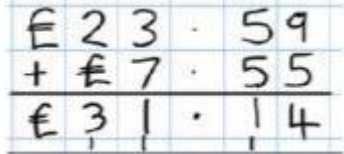

For those children, that are confident after AFL, the below method should be used.

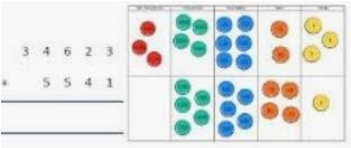

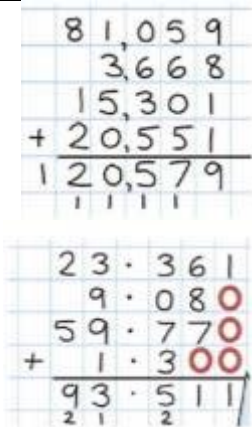

Exchange ten ones for a ten. Model using Dienes, Numicon and place value counters.

$$\begin{array}{r} 536 \\ + 85 \\ \hline 621 \\ 11 \end{array}$$

Addition - Year 4

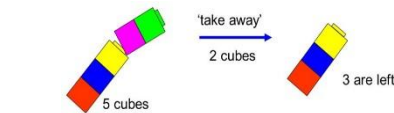

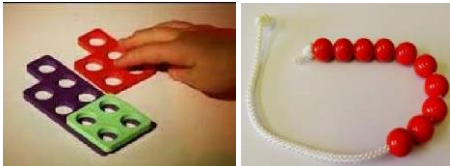

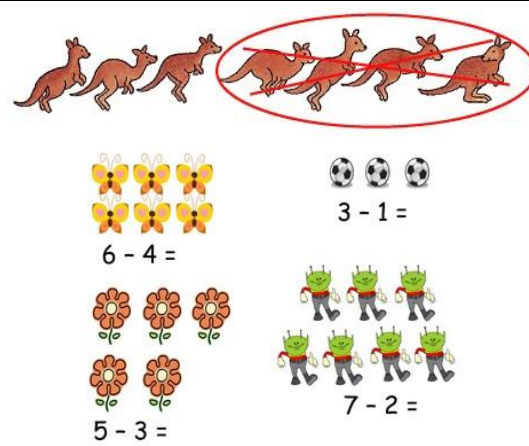

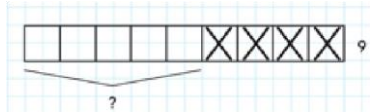

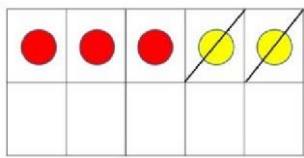

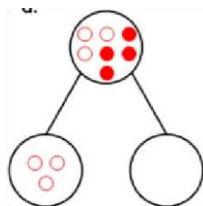

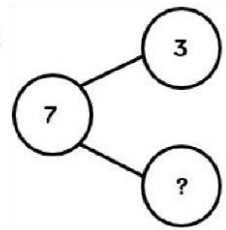

Objective and Strategy	Concrete	Pictorial	Abstract				
<p>Using formal written methods of columnar addition where appropriate</p> <p>Add numbers with up to 4 digits (with exchange)</p>	<p>Children continue to use dienes or place value counters to add, exchanging ten ones for a ten and ten tens for a hundred and ten hundreds for a thousand.</p>  <p>The calculation will be shown alongside the manipulative used to see the connection</p> <table><thead><tr><th>Model</th><th>Calculation</th></tr></thead><tbody><tr><td></td><td></td></tr></tbody></table>	Model	Calculation			 <p>Children can draw a pictorial representation of the columns and place value counters to further support their learning and understanding.</p>	 <p>Continue from previous work to carry hundreds as well as tens.</p>
Model	Calculation						
<p>Add decimals with 2 decimal places, including money.</p>	 <p>Introduce decimal place value counters and model exchange for addition.</p>		 <p>As the children move on, introduce decimals with the same number of decimal places and different. Money can be used here.</p>				

Addition - Year 5/6

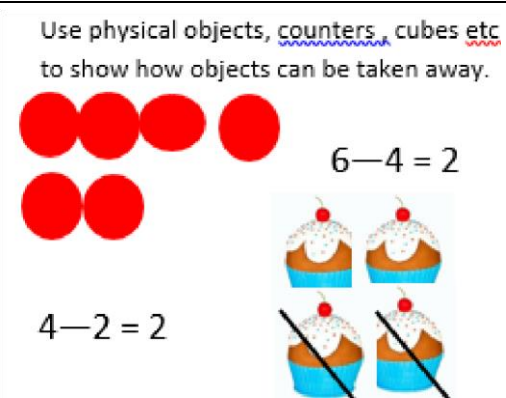

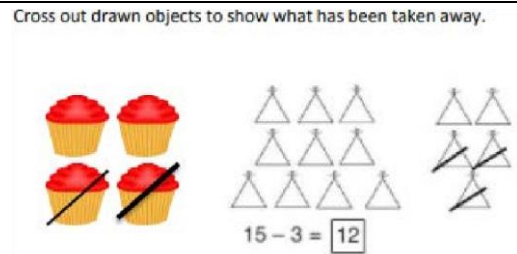

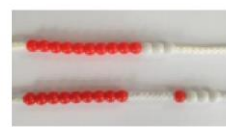

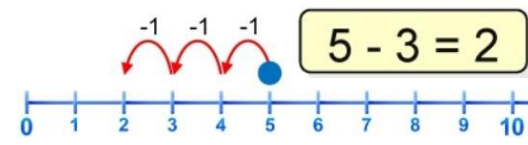

Objective and Strategy	Concrete	Pictorial	Abstract
Add numbers with more than 4 digits.	See Year 4	See Year 4	 <p>Children should have abstract supported by a pictorial or concrete if needed.</p>
Add several numbers of increasing complexity, including adding money, measure and decimals with different numbers of decimal points.	See Year 4	See Year 4	 <p>Insert zeros for place holders.</p>

Subtraction

Subtraction - EYFS

Objectives	Concrete	Pictorial	Abstract				
<p>-Knows that a group of things change in quantity when something is taken away</p> <p>-Find one less from a group of five objects, then ten objects.</p> <p>-In practical activities and discussion, beginning to use the vocabulary involved in subtracting.</p> <p>-Using quantities and objects, they subtract two single digit numbers and count back to find the answer.</p>	<div></div> <p>Use toys and general classroom resources for children to physically manipulate, group/regroup.</p> <div></div> <div></div> <p>Use specific maths resources such as snap cubes, Numicon, bead strings etc.</p> <div></div> <p>Use visual supports such as ten frames, part part whole and subtraction mats, with the physical objects and resources that can be manipulated.</p>	<div></div> <p>A group of pictures for children to cross out or cover quantities to support subtraction.</p> <div></div> <p>Use visual supports such as ten frames, part part whole and bar model with pictures/icons.</p>	<p>A focus on symbols and numbers to form a calculation.</p> <div></div> <div><div>10 - 6 = 4</div></div> <table><tr><td>3</td><td>?</td></tr><tr><td colspan="2">7</td></tr></table> <p>7 - 3 = ?</p> <div></div> <p>* No expectation for children to be able to record a number sentence/addition calculation.</p>	3	?	7	
3	?						
7							

Subtraction - Year 1

Objective and Strategy	Concrete	Pictorial	Abstract
<p>Subtract one-digit and two-digit numbers to 20, including 0.</p> <p>Taking away ones</p>	<p>Use physical objects, counters, cubes etc to show how objects can be taken away.</p>  <p>$6 - 4 = 2$</p> <p>$4 - 2 = 2$</p>	<p>Cross out drawn objects to show what has been taken away.</p>  <p>$15 - 3 = 12$</p>	<p>$7 - 4 = 3$</p> <p>$16 - 9 = 7$</p>
<p>Counting back</p>	<p>Make the larger number in your subtraction. Move the beads along your bead string as you count backwards in ones.</p>  <p>$13 - 4$</p> <p>Use counters and move them away from the group as you take them away counting backwards as you go.</p> 	 <p>$5 - 3 = 2$</p> <p>Count back on a number line or track Start at the bigger number and count back the smaller number showing the jumps on the number line.</p>	<p>Put 13 in your head, count back 4. What number are you at? (Use your fingers to help you)</p>

Find the difference

Compare objects and amounts

'I am 2 years older than my sister'

Lay objects to represent bar model.

Count on to find the difference.

Comparison Bar Models

Draw bars to find the difference between 2 numbers.

Lisa is 13 years old. Her sister is 22 years old. Find the difference in age between them.

Represent and use number bonds and related subtraction facts within 20

Part-part whole model

Link to addition. Use PPW model to model the inverse.

If 10 is the whole and 6 is one of the parts, what is the other part?

$$10 - 6 = 4$$

Use a pictorial representation of objects to show the part-part whole model

Move to using numbers within the part whole model.

Make 10

$$14 - 9 =$$

Make 14 on the ten frame. Take away the four first to make 10 and then take away one more so you have taken away 5. You are left with the answer of 9.

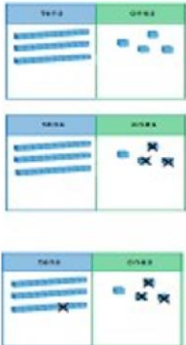

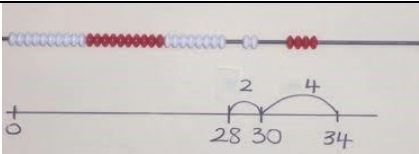

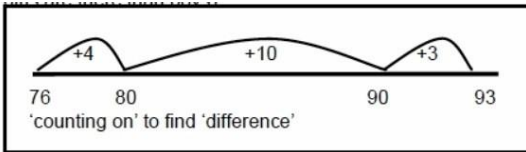

Start at 13. Take away 3 to reach 10. Then take away the remaining 4 so you have taken away 7 altogether. You have reached your answer.

$$16 - 8 =$$

How many do we take off to reach the next 10?
How many do we have left to take off?

Subtraction - Year 2

Objective and Strategy	Concrete	Pictorial	Abstract				
<p><i>Subtract a two-digit number and ones, a two digit number and tens, two two-digit numbers</i></p> <p>Partitioning to subtract without re-</p> <p>Grouping: 'Friendly numbers'</p>	<div><div>34—13 = 21</div><div></div><div>Use Dienes to show how to partition the number when subtracting without regrouping.</div><div>The calculation will be shown alongside the manipulative used</div><table><tr><th>Model</th><th>Calculation</th></tr><tr><td></td><td></td></tr></table></div>	Model	Calculation			<p>Children draw representations of Dienes and cross off.</p> <div></div> <div>43—21 = 22</div>	<div>43—21 = 22</div> <div><p>Recording subtraction in columns supports place value and prepares for formal written methods with larger numbers.</p><p>Toward the end of the year, children move to more formal recording using partitioning method:</p><p>e.g. 43-21=22</p><div>40 and 3</div><div><div>-20 and 1</div><div><u>20 and 2</u></div></div></div>
Model	Calculation						
Make ten strategy	<div></div> <div>34—28</div> <div>Use a bead bar or bead strings to model counting to next ten and the rest.</div>	<div></div> <div>Use a number line to count on to next ten and then the rest.</div>	93—76 = 17				

Subtraction - Year 3

Objective and Strategy

To subtract numbers with up to three-digits, using formal written methods of columnar subtraction

Column subtraction (without exchanging)

Concrete

Use base 10 or Numicon to model

The calculation will be shown alongside the model chosen to see the connection

Model	Calculation

Pictorial

Children are to be secure with use of PV counters before moving onto abstract.

Abstract

Children should begin with the expanded form. Moving onto a more formal way as below.

$$47 - 24 = 23$$

$$\begin{array}{r} 40 + 7 \\ - 20 + 4 \\ \hline 20 + 3 \end{array}$$

$$728 - 582 = 146$$

H	T	U
7	2	8
5	8	2
1	4	6

Column
Subtraction
(with
exchanging)

Begin with base 10 or Numicon. Move to pv counters, modelling the exchange of a ten into ten ones. Use the phrase 'take and make' for exchange.

Column method (using base 10 and having to exchange)
45-26

- 1) Start by partitioning 45
- 2) Exchange one ten for ten more ones
- 3) Subtract the ones, then the tens.

Use Base 10 to start with before moving on to place value counters. Start with one exchange before moving onto subtractions with 2 exchanges.

Make the larger number with the place value counters

Calculations

$$\begin{array}{r} 234 \\ - 88 \\ \hline \end{array}$$

Start with the ones, can I take away 8 from 4 easily? I need to exchange one of my tens for ten ones.

Calculations

$$\begin{array}{r} 234 \\ - 88 \\ \hline \end{array}$$

Now I can subtract my ones.

Calculations

$$\begin{array}{r} 234 \\ - 88 \\ \hline \end{array}$$

45
-29
16

Tens | Ones

10 + 6 = 16

When confident, children can find their own way to record the exchange/regrouping

Children should begin with the expanded form. Moving onto a more formal way as below (bottom picture).

836-254=582

728-582=146

Now look at the tens, can I take away 8 tens easily? I need to exchange one hundred for ten tens.

Now I can take away eight tens and complete my subtraction

Show children how the concrete method links to the written method alongside your working. Cross out the numbers when exchanging and show where we write our new amount.

Subtraction - Year 4

Objective and Strategy

Subtract numbers with up to 4 digits using the formal written methods appropriate of columnar subtraction where appropriate

Year 4 subtraction with up to 4 digits.

Concrete

Model process of exchange using Numicon, base ten and then move to PV counters.

Use the phrase 'take and make' for exchange- see Y3

The calculation will be shown alongside the model chosen to see the connection

Model Calculation

--	--

Pictorial

Children to draw pv counters and show their exchange—see Y3

The calculation will be shown alongside the model chosen to see the connection

Model	Calculation

Abstract

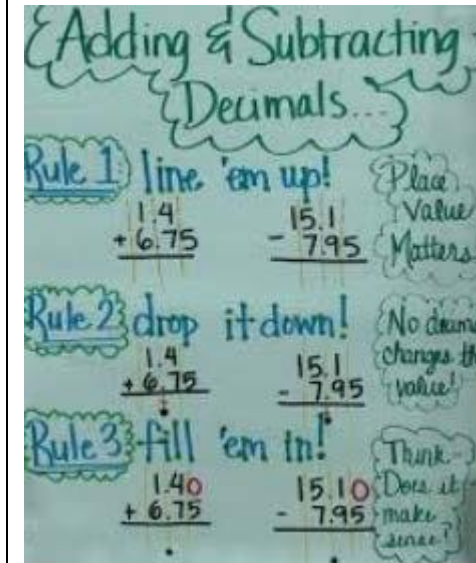

This will lead to an understanding of subtracting any number including decimals.

Introduce decimal subtraction through context of money

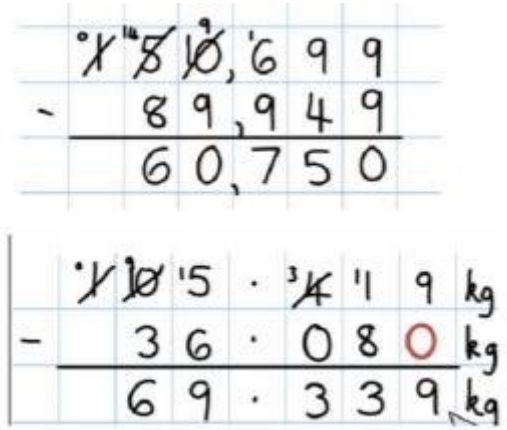

Children to be encouraged to use counters to represent numbers and take counters away to subtract.

When confident, children can find their own way to record the exchange/regrouping

Subtraction- Year 5/6

Objective and Strategy	Concrete	Pictorial	Abstract
<p>Subtract with at least 4 digits, including money and measures.</p> <p>Subtract with increasingly large and more complex numbers and decimal values (up to 3 decimal place).</p>	See Year 4	See Year 4	

Multiplication

Multiplication -EYFS

Objectives

- Solve problems including doubling

Concrete

2 4 6 8 10

Counting and other maths resources for children to make 2 equal groups.

life examples

children to see concept of doubling as adding two equal groups.

Physical and real that encourage

Pictorial

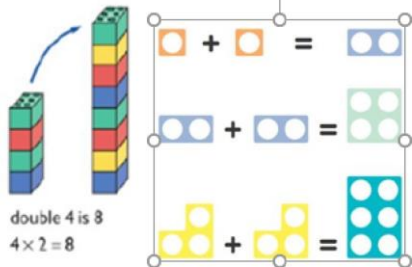

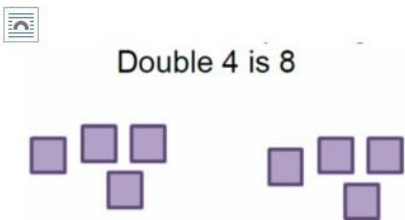

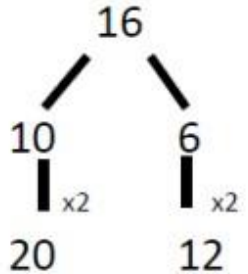

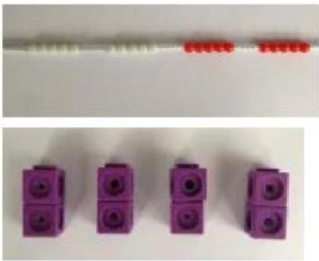

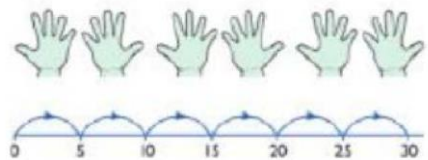

Pictures and icons that encourage children to see concept of doubling as adding two equal groups.

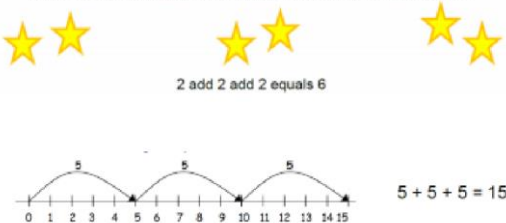

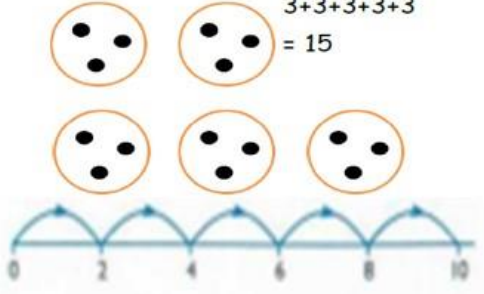

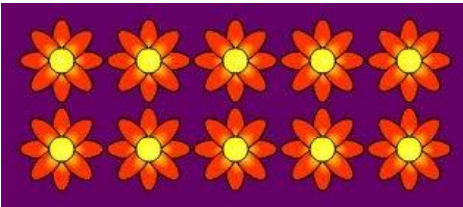

Abstract

1+1=	7+7=
2+2=	8+8=
3+3=	9+9=
4+4=	10+10=
5+5=	11+11=
6+6=	12+12=

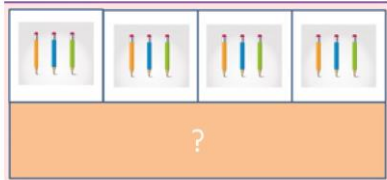

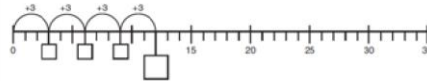

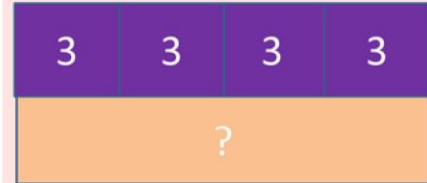

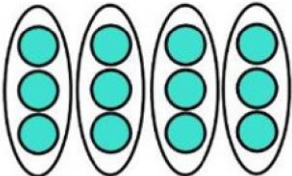

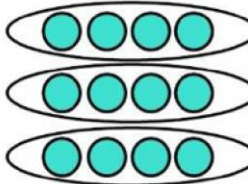

Addition calculations to model adding two equal groups.

Multiplication - Year 1

Objective and Strategy	Concrete	Pictorial	Abstract
Doubling	<p>Use practical activities using manipulatives including cubes and Numicon to demonstrate doubling</p> 	<p>Draw pictures to show how to double numbers</p> 	 <p>Partition a number and then double each part before recombining it back together.</p>
Counting in multiples	 <p>Count in multiples supported by concrete objects in equal groups.</p>	 <p>Use a number line or pictures to continue support in counting in multiples.</p>	<p>Count in multiples of a number aloud.</p> <p>Write sequences with multiples of numbers.</p> <p>2, 4, 6, 8, 10</p> <p>5, 10, 15, 20, 25, 30</p>

<p>Repeated addition</p>	 <p>Use different objects to add equal groups.</p>	<p>There are 3 plates. Each plate has 2 star biscuits on. How many biscuits are there?</p>  <p>2 + 2 + 2 = 6</p> <p>5 + 5 + 5 = 15</p>	<p>Write addition sentences to describe objects and pictures.</p>  <p>2 + 2 + 2 + 2 + 2 = 10</p>
		<p>Use pictorial including number lines to solve problems.</p> <p>There are 3 sweets in one bag. How many sweets are in 5 bags altogether?</p>  <p>3 + 3 + 3 + 3 + 3 = 15</p>	
<p>Understanding arrays</p>	<p>Use objects laid out in arrays to find the answers to 2 lots 5, 3 lots of 2 etc.</p> 		<p>3 x 2 = 6</p> <p>2 x 5 = 10</p>

Multiplication - Year 2

Objective and Strategy	Concrete	Pictorial	Abstract
Counting in multiples of 2, 3, 4, 5, 10 from 0 (repeated addition)	<p>Count the groups as children are skip counting, children may use their fingers as they are skip counting. Use bar models.</p>  $5 + 5 + 5 + 5 + 5 + 5 + 5 + 5 = 40$  	<p>Number lines, counting sticks and bar models should be used to show representation of counting in multiples.</p>    	<p>Count in multiples of a number aloud.</p> <p>Write sequences with multiples of numbers.</p> <p>0, 2, 4, 6, 8, 10</p> <p>0, 3, 6, 9, 12, 15</p> <p>0, 5, 10, 15, 20, 25, 30</p> $4 \times 3 = \square$
Multiplication is commutative	<p>Create arrays using counters and Numicon.</p>    <p>Pupils should understand that an array can represent different equations and that, as multiplication is commutative, the order of the multiplication does not affect the answer.</p>  	<p>Use representations of arrays to show different calculations and explore commutativity.</p>  	<p>$12 = 3 \times 4$</p> <p>$12 = 4 \times 3$</p> <p>Use an array to write multiplication sentences and reinforce repeated addition.</p>  <p>$5 + 5 + 5 = 15$</p> <p>$3 + 3 + 3 + 3 + 3 = 15$</p> <p>$5 \times 3 = 15$</p> <p>$3 \times 5 = 15$</p>

Using the
Inverse

*This should
be taught
alongside
division, so
pupils learn
how they
work
alongside
each other.*

$2 \times 4 = 8$

$4 \times 2 = 8$

$8 \div 2 = 4$

$8 \div 4 = 2$

$8 = 2 \times 4$

$8 = 4 \times 2$

$2 = 8 \div 4$

$4 = 8 \div 2$

Show all 8 related fact family sentences.

Multiplication - Year 3

Objective and Strategy	Concrete	Pictorial	Abstract																						
<p><i>Multiplying two digit number by a one digit number</i></p> <p>Grid method progressing to the formal method.</p> <p>Solving problems including missing number problems, integer scaling problems.</p>	<p>Show the link with arrays to first introduce the grid method.</p> <div><table><tr><td>x</td><td>10</td><td>3</td></tr><tr><td>4</td><td></td><td></td></tr></table><p>4 rows of 10 4 rows of 3</p></div> <p>Move on to using Base 10 to move towards a more compact method.</p> <div><table><tr><td>x</td><td>T</td><td>U</td></tr><tr><td></td><td></td><td></td></tr></table><p>4 rows of 13</p></div> <p>Move on to place value counters to show how we are finding groups of a number.</p> <div><table><tr><td>x</td><td>30</td><td>6</td></tr><tr><td>7</td><td></td><td></td></tr></table></div> <p>Add up each column, starting with the ones making any exchanges needed.</p> <p>The calculation will be shown alongside the model chosen to see the connection</p> <table><tr><th>Model</th><th>Calculation</th></tr><tr><td></td><td></td></tr></table>	x	10	3	4			x	T	U				x	30	6	7			Model	Calculation			<p>Children can represent their work with place value counters in a way that they understand.</p> <p>They can draw the counters using colours to show different amounts or just use the circles in the different columns to show their thinking as shown below.</p> <div></div> <p>Bar model are used to explore missing numbers</p> <div></div>	<p>Start with multiplying by one digit numbers and showing the clear addition alongside the grid.</p> <p>TO x O</p> <div></div> <p>Children to add up each column to find the answer.</p>
x	10	3																							
4																									
x	T	U																							
x	30	6																							
7																									
Model	Calculation																								

Multiplication- Year 4

Objective and Strategy

Multiply two digit and three-digit numbers by a one-digit number using formal written layout

Grid method recap from year 3 for 2 digits x 1 digit

Multiplying numbers by 1 digit (year 4 expectation)

Concrete

Move on to place value counters to show how we are finding groups of a number. We are multiplying by 4 so we need 4 rows.

Calculations
4 x 126

Fill each row with 126.

Calculations
4 x 126

Add up each column, starting with the ones making any exchanges needed.

Then you have your answer.

Pictorial

Children can represent their work with place value counters in a way that they understand.

They can draw the counters using colours to show different amounts or just use the circles in the different columns to show their thinking as shown below.

Abstract

HTO x O

Children to add up each column to find the answer.

Column multiplication

Children can continue to be supported by place value counters at the stage of multiplication. This initially done where there is no regrouping. $321 \times 2 = 642$

Hundreds	Tens	Ones
		
		
		
		

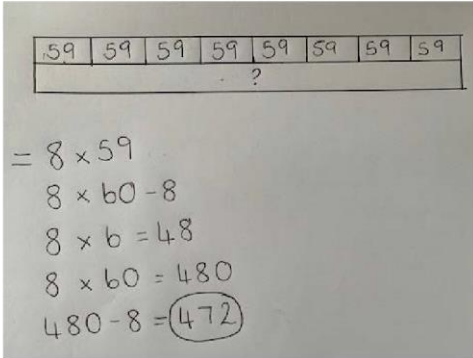

It is important at this stage that they always multiply the ones first.

The corresponding long multiplication is modelled alongside

Model	Calculation

This grid method may be used to show how this relates to a formal written method.

x	100	20	4
5	500	100	20

Bar modelling and number lines can support learners when solving problems with multiplication alongside the formal written methods.

1	2	4	x	5	=
1	2	4			
x				5	
		2	0	(4 x 5)	
	1	0	0	(20 x 5)	
	5	0	0	(100 x 5)	
	6	2	0		

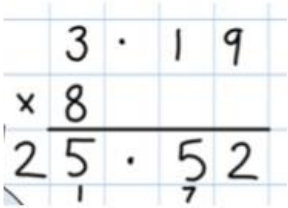

1	2	4	x	5	=
x				5	
	6	2	0		

This may lead to a compact method.

Multiplication Year 5

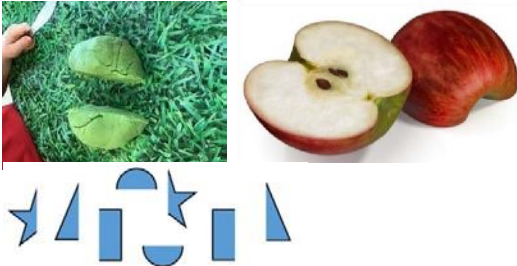

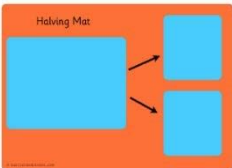

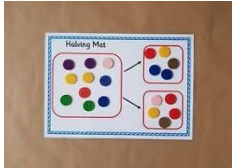

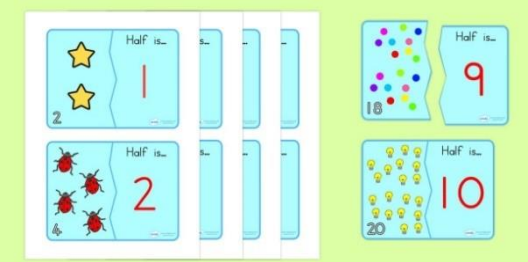

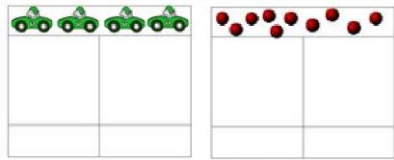

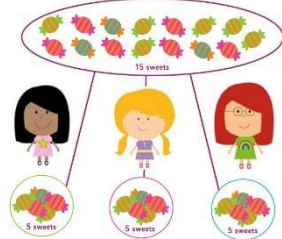

Objective and Strategy	Concrete	Pictorial	Abstract																																																																																		
<p><i>Multiply numbers up to 4-digits by a one-digit number using the format written method, including long multiplication for 2-digit numbers</i></p> <p>Column multiplication for 3 and 4 digits x 1 digit</p>	<p>Children can continue to be supported by place value counters at the stage of multiplication. This initially done where there is no regrouping. 321 x 2 = 642</p> <table><tr><th>Hundreds</th><th>Tens</th><th>Ones</th></tr><tr><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td></tr></table> <p>It is important at this stage that they always multiply the ones first.</p> <p>The corresponding long multiplication is modelled alongside</p>	Hundreds	Tens	Ones													<table><tr><td>x</td><td>300</td><td>20</td><td>7</td></tr><tr><td>4</td><td>1200</td><td>80</td><td>28</td></tr></table> <div>$\begin{array}{r} 327 \\ \times 4 \\ \hline 28 \\ 80 \\ 1200 \\ \hline 1308 \end{array}$<table><tr><td></td><td>3</td><td>2</td><td>7</td></tr><tr><td>x</td><td></td><td></td><td>4</td></tr><tr><td></td><td>1</td><td>3</td><td>0</td></tr><tr><td></td><td></td><td>1</td><td>2</td></tr><tr><td></td><td></td><td></td><td>8</td></tr></table><p>This may lead to a compact method.</p></div>	x	300	20	7	4	1200	80	28		3	2	7	x			4		1	3	0			1	2				8

Vocabulary	Groups of, lots of, times, array, altogether, multiply, multiplied by, repeated addition, sets of, equal groups, times as big as, commutative, product, multiples of, scale up, inverse, derive, factor pairs, composite numbers, prime number, factors, squared, cubed																																																																																				

Multiplication - Year 6

Objective and Strategy	Concrete	Pictorial	Abstract
Multiply decimal up to 2 decimal place by a single digit.			<p>Remind children that the single digit belongs in the units column. Line up the decimal points in the question and the answer.</p> 

Division

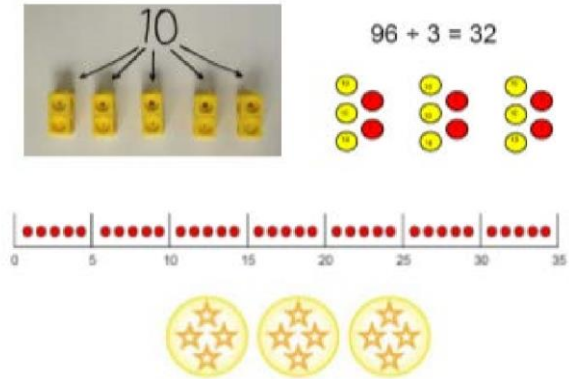

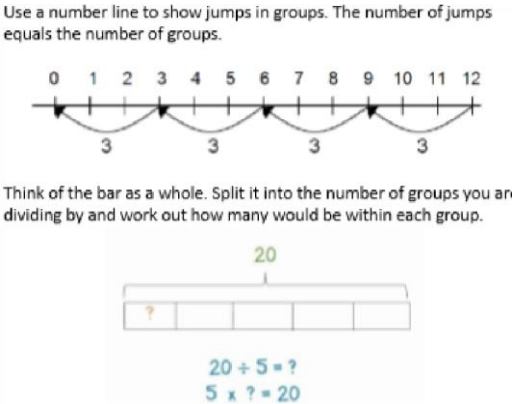

Division - EYFS

Objectives	Concrete	Pictorial	Abstract
<p>Solve problems including halving and sharing.</p> <ul style="list-style-type: none"> Halving a whole, halving a quantity of objects. Sharing a quantity of objects. 	 <p>Children have the opportunity to physically cut objects, food or shapes in half.</p>     <p>Use visual supports such as halving mats and part part whole, with the physical objects and resources that can be manipulated.</p> <p>Counting and other maths resources for children to explore sharing between 3 or more.</p> <p>Counting and other maths resources for children to share into two equal groups.</p>	 <p>Pictures and icons that encourage children to see concept of halving in relation to subitising, addition and subtraction knowledge. i.e. Knowing 4 is made of 2 groups of 2, so half of 4 is 2.</p>  <p>Bar model with pictures or icons to support understanding of finding 2 equal parts of a number, to further understand how two halves make a whole.</p>  <p>Pictures for children to create and visualise 3 or more equal groups.</p>	

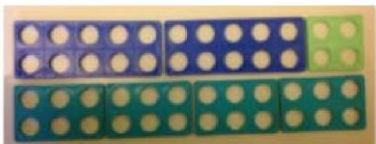

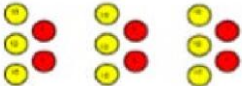

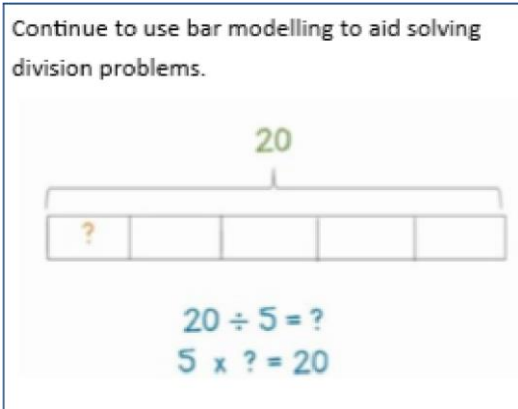

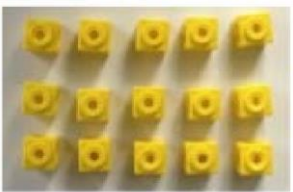

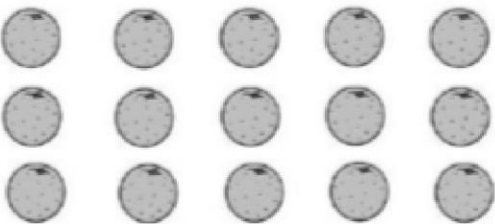

Division - Year 1

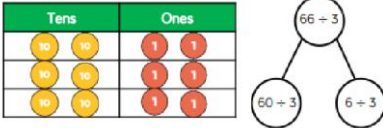

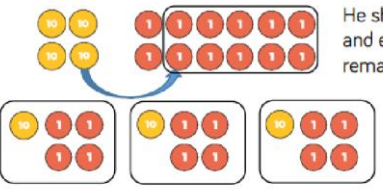

Objective and Strategy	Concrete	Pictorial	Abstract
Division as sharing (sharing objects into groups)	<p>I have 10 cubes, can you share them equally in 2 groups?</p>	<p>Children use pictures or shapes to share quantities.</p> <p>Children use bar modelling to show and support understanding.</p> <p>$12 \div 4 = 3$</p>	<p>Share 9 buns between three people.</p> <p>$9 \div 3 = 3$</p>

Division - Year 2

Objective and Strategy	Concrete	Pictorial	Abstract
Division as grouping	<p>Divide quantities into equal groups. Use cubes, counters, objects or place value counters to aid understanding.</p> 	<p>Use a number line to show jumps in groups. The number of jumps equals the number of groups.</p> 	<p>$28 \div 7 = 4$</p> <p>Divide 28 into 7 groups. How many are in each group?</p>

Division - Year 3

Objective and Strategy	Concrete	Pictorial	Abstract
Division as grouping	<p>Use cubes, counters, objects or place value counters to aid understanding.</p>  <p>24 divided into groups of 6 = 4</p> $96 \div 3 = 32$ 	<p>Continue to use bar modelling to aid solving division problems.</p> 	<p>How many groups of 6 in 24?</p> $24 \div 6 = 4$
Division with arrays	 <p>Link division to multiplication by creating an array and thinking about the number sentences that can be created.</p> <p>Eg $15 \div 3 = 5$ $5 \times 3 = 15$ $15 \div 5 = 3$ $3 \times 5 = 15$</p>	<p>Draw an array and use lines to split the array into groups to make multiplication and division sentences</p> 	<p>Find the inverse of multiplication and division sentences by creating eight linking number sentences.</p> $7 \times 4 = 28$ $4 \times 7 = 28$ $28 \div 7 = 4$ $28 \div 4 = 7$ $28 = 7 \times 4$ $28 = 4 \times 7$ $4 = 28 \div 7$ $7 = 28 \div 4$

<p>Divide 2digit numbers by a 1 digit number by partitioning into tens and ones using a place value grid</p>	<p>Eva uses a place value grid and part-whole model to solve $66 \div 3$</p> 	<p>See part- whole model</p>	
<p>Divide numbers that involve exchanging between the tens and ones. The answers do not have remainders.</p>	<p>Ron uses place value counters to divide 42 into three equal groups</p>  <p>He shares the tens first and exchanges the remaining ten for ones.</p> <p>Then he shares the ones. $42 \div 3 = 14$</p>	<p>Annie uses a similar method to divide 42 by 3</p>  <p>Children may use pictorial representation for the pv counters, alongside the part-whole model</p> <p>Children use their times-tables to partition the number into multiples of the divisor.</p>	<div> $96 \div 8$ $96 \div 4$ $96 \div 3$ $96 \div 6$ </div> <div> <p>Compare the statements using $<$, $>$ or $=$</p> $48 \div 4$ <input type="text"/> $36 \div 3$ $52 \div 4$ <input type="text"/> $42 \div 3$ $60 \div 3$ <input type="text"/> $60 \div 4$ </div>

Division with a remainder

14 ÷ 3 =

Divide objects between groups and see how much is left over

Use place value counters to work out $94 \div 4$
Did you need to exchange any tens for ones?
Is there a remainder?

Tens	Ones

29

Moving on to:

Jump forward in equal jumps on a number line then see how many more you need to jump to find a remainder.

Draw dots and group them to divide an amount and clearly show a remainder.

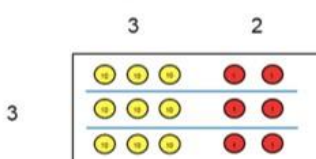

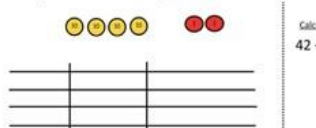

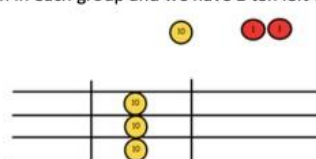

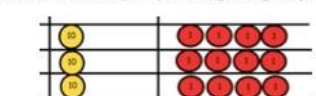

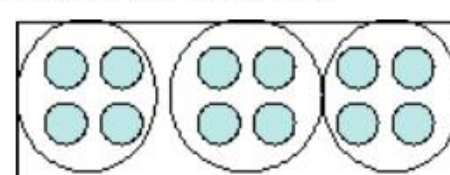

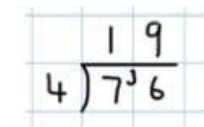

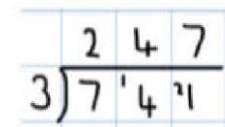

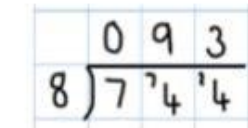

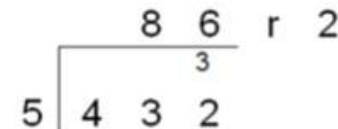

Use bar models to show division with remainders.

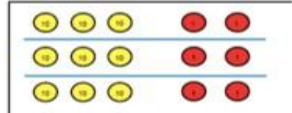

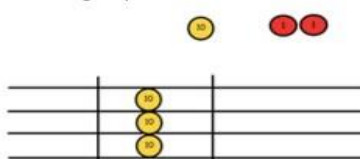

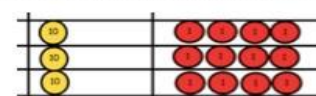

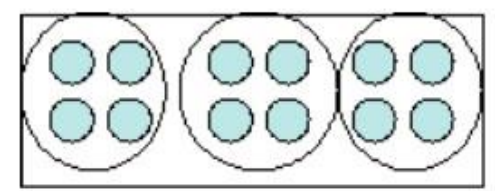

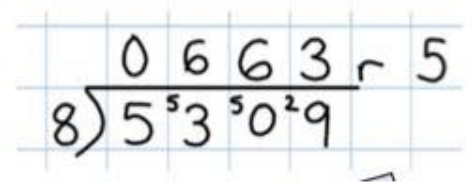

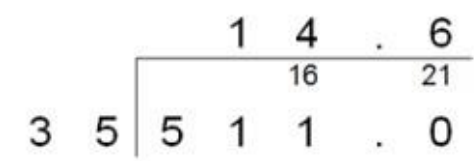

Complete written divisions and show the remainder using r.

$29 \div 8 = 3 \text{ REMAINDER } 5$
↑ ↑ ↑ ↑
dividend divisor quotient remainder

Division - Year 4

Objective and Strategy	Concrete	Pictorial	Abstract
<p>Divide up to 3 digit numbers by 1 digit. Short Division</p>	<p>$96 \div 3$</p> <p>Tens Units</p> <p>3 2</p>  <p>Use place value counters to divide using the bus stop method alongside</p>  <p>$42 \div 3 =$</p> <p>Start with the biggest place value, we are sharing 40 into three groups. We can put 1 ten in each group and we have 1 ten left over.</p>  <p>We exchange this ten for ten ones and then share the ones equally among the groups.</p>  <p>We look how much in 1 group so the answer is 14.</p>	<p>Students can continue to use drawn diagrams with dots or circles to help them divide numbers into equal groups.</p>  <p>Encourage them to move towards counting in multiples to divide more efficiently.</p>	<p>Begin with divisions that divide equally with no remainder</p>   <p>Children should be aware that a 0 is used to keep place value, if the number is not divisible.</p>  <p>Move onto divisions with a remainder.</p> 

Division - Year 5

Objective and Strategy	Concrete	Pictorial	Abstract
<p>Divide at least 4 digit numbers by 1 digit.</p> <p>Interpret remainders appropriately for the context</p> <p>Short Division</p>	<p>$96 \div 3$</p> <p>Tens Units</p> <p>3 2</p>  <p>Use place value counters to divide using the bus stop method alongside</p>  <p>42 \div 3 =</p> <p>Start with the biggest place value, we are sharing 40 into three groups. We can put 1 ten in each group and we have 1 ten left over.</p>  <p>We exchange this ten for ten ones and then share the ones equally among the groups.</p>  <p>We look how much in 1 group so the answer is 14.</p>	<p>Students can continue to use drawn diagrams with dots or circles to help them divide numbers into equal groups.</p>  <p>Encourage them to move towards counting in multiples to divide more efficiently.</p>	 <p>Finally move into decimal places to divide the total accurately.</p> 

Division - Year 6

Objective and Strategy	Abstract
Long Division	<p>Step 1 – a remainder in the ones</p> $\begin{array}{r} \text{h t o} \\ 041\text{R}1 \\ 4 \overline{) 165} \end{array}$ <p>4 does not go into 1 (hundred). So combine the 1 hundred with the 6 tens (160).</p> <p>4 goes into 16 four times.</p> <p>4 goes into 5 once, leaving a remainder of 1.</p> $\begin{array}{r} \text{th h t o} \\ 0400\text{R}7 \\ 8 \overline{) 3207} \end{array}$ <p>8 does not go into 3 of the thousands. So combine the 3 thousands with the 2 hundreds (3,200).</p> <p>8 goes into 32 four times ($3,200 \div 8 = 400$)</p> <p>8 goes into 0 zero times (tens).</p> <p>8 goes into 7 zero times, and leaves a remainder of 7.</p> $\begin{array}{r} \text{h t o} \\ 061 \\ 4 \overline{) 247} \\ \underline{-4} \\ 3 \end{array}$ <p>When dividing the ones, 4 goes into 7 one time. Multiply $1 \times 4 = 4$, write that four under the 7, and subtract. This finds us the remainder of 3.</p> <p>Check: $4 \times 61 + 3 = 247$</p> $\begin{array}{r} \text{th h t o} \\ 0402 \\ 4 \overline{) 1609} \\ \underline{-8} \\ 1 \end{array}$ <p>When dividing the ones, 4 goes into 9 two times. Multiply $2 \times 4 = 8$, write that eight under the 9, and subtract. This finds us the remainder of 1.</p> <p>Check: $4 \times 402 + 1 = 1,609$</p> <p>Step 2 – a remainder in the tens</p>

1. Divide.	2. Multiply & subtract.	3. Drop down the next digit.
$\begin{array}{r} \text{t o} \\ 2 \overline{) 58} \end{array}$ <p>Two goes into 5 two times, or 5 tens $\div 2 = 2$ whole tens -- but there is a remainder!</p>	$\begin{array}{r} \text{t o} \\ 2 \overline{) 58} \\ -4 \\ \hline 1 \end{array}$ <p>To find it, multiply $2 \times 2 = 4$, write that 4 under the five, and subtract to find the remainder of 1 ten.</p>	$\begin{array}{r} \text{t o} \\ 2 \overline{) 58} \\ -4 \\ \hline 18 \end{array}$ <p>Next, drop down the 8 of the ones next to the leftover 1 ten. You combine the remainder ten with 8 ones, and get 18.</p>

1. Divide.	2. Multiply & subtract.	3. Drop down the next digit.
$\begin{array}{r} \text{t o} \\ 2 \overline{) 58} \\ -4 \\ \hline 18 \end{array}$ <p>Divide 2 into 18. Place 9 into the quotient.</p>	$\begin{array}{r} \text{t o} \\ 2 \overline{) 58} \\ -4 \\ \hline 18 \\ -18 \\ \hline 0 \end{array}$ <p>Multiply $9 \times 2 = 18$, write that 18 under the 18, and subtract.</p>	$\begin{array}{r} \text{t o} \\ 2 \overline{) 58} \\ -4 \\ \hline 18 \\ -18 \\ \hline 0 \end{array}$ <p>The division is over since there are no more digits in the dividend. The quotient is 29.</p>

Step 3 – a remainder in any of the place values

1. Divide.	2. Multiply & subtract.	3. Drop down the next digit.
$\begin{array}{r} \text{h t o} \\ 1 \\ 2 \overline{) 278} \\ -2 \\ \hline 0 \end{array}$ <p>Two goes into 2 one time, or 2 hundreds $\div 2 = 1$ hundred.</p>	$\begin{array}{r} \text{h t o} \\ 1 \\ 2 \overline{) 278} \\ -2 \\ \hline 0 \end{array}$ <p>Multiply $1 \times 2 = 2$, write that 2 under the two, and subtract to find the remainder of zero.</p>	$\begin{array}{r} \text{h t o} \\ 18 \\ 2 \overline{) 278} \\ -2 \\ \hline 07 \end{array}$ <p>Next, drop down the 7 of the tens next to the zero.</p>
Divide.	Multiply & subtract.	Drop down the next digit.
$\begin{array}{r} \text{h t o} \\ 13 \\ 2 \overline{) 278} \\ -2 \\ \hline 07 \end{array}$ <p>Divide 2 into 7. Place 3 into the quotient.</p>	$\begin{array}{r} \text{h t o} \\ 13 \\ 2 \overline{) 278} \\ -2 \\ \hline 07 \\ -6 \\ \hline 1 \end{array}$ <p>Multiply $3 \times 2 = 6$, write that 6 under the 7, and subtract to find the remainder of 1 ten.</p>	$\begin{array}{r} \text{h t o} \\ 13 \\ 2 \overline{) 278} \\ -2 \\ \hline 07 \\ -6 \\ \hline 18 \end{array}$ <p>Next, drop down the 8 of the ones next to the 1 leftover ten.</p>
1. Divide.	2. Multiply & subtract.	3. Drop down the next digit.
$\begin{array}{r} \text{h t o} \\ 139 \\ 2 \overline{) 278} \\ -2 \\ \hline 07 \\ -6 \\ \hline 18 \end{array}$ <p>Divide 2 into 18. Place 9 into the quotient.</p>	$\begin{array}{r} \text{h t o} \\ 139 \\ 2 \overline{) 278} \\ -2 \\ \hline 07 \\ -6 \\ \hline 18 \\ -18 \\ \hline 0 \end{array}$ <p>Multiply $9 \times 2 = 18$, write that 18 under the 18, and subtract to find the remainder of zero.</p>	$\begin{array}{r} \text{h t o} \\ 139 \\ 2 \overline{) 278} \\ -2 \\ \hline 07 \\ -6 \\ \hline 18 \\ -18 \\ \hline 0 \end{array}$ <p>There are no more digits to drop down. The quotient is 139.</p>
