Where are the five oceans on the world map?

Where are the seven continents and oceans in relation to the United Kingdom?

What is the equator?

Which areas in the world are hot and which are cold, in relation to the Equator?

Where are the North Pole and South Pole?

Key Content and Vocabulary

Continent—One of the seven very large areas/land masses of the world: These are: **North America, South America, Europe, Asia, Africa, Oceania, Antarctic**. Europe is the continent in which we live.

Ocean— An ocean is a very large sea. There are 5 oceans in the World: **The Atlantic, the Pacific, The Indian, The Southern and the Arctic Ocean**.

The Equator—The Equator is an imaginary line through the middle of the Earth which splits the planet into the **Northern and Southern Hemisphere**.

North Pole—the Northern end of the world's axis

South Pole—the Southern end of the world's axis.

Axis—The axis is an imaginary line through the centre of **the Earth**, around which the planet rotates/turns.

Country—A land that is controlled by a single government. Countries can be large or small.

Capital city—The city from where the government runs the country. Our capital city is London.

Population—the total number of people living in a country, city or area.

Continents and Oceans
